

Before you begin to use this toy, you must read all the information in this manual.

Warning:

Do not sit, stand, or climb on your structure until all screws are secured into their place. A screw must be inserted into the tube hole that aligns with the connector for the toy to be safe and secure. The screws must be inserted on both ends of each tube. The toy will fall apart without the screws in place.

- You can only apply weight on the panels, when you secure the panels with the panel screws, to the supporting tubes on all four sides. Never push the panels out from the inside, always remove them carefully by first removing screw fasteners.

- Throwing the panel may result in the panel chipping at the edges.

- All play structures need to be assembled and tested by an adult 'supervisor', according to the instructions and safety standards listed below.

- The product is intended for home/domestic use only and is not suitable for professional or commercial use, nor for municipal playgrounds.

- When you assemble a play structure, follow the exact instructions in the manual.

- Place the bottom supports of play structure on a flat surface. Do not place your structure on an elevated or inclined surface, your play structure should always be at floor level or ground level.

- Whether used indoors or outdoors, place the structure on a safety floor material i.e. Carpet, mat grass, shredded tire etc.

Supervision and playing

1. An adult must always be present to watch over the children when they are building, playing or using the structures. Parents are liable for the children's actions.
2. Children Play on the play structures at their and their parent's own risk.
3. Do not misuse the play structures, use it for the purpose it was intended.
4. The maximum weight on the structures is a total of 150lbs.
5. No play should be allowed on structures which have not been completed, been damaged, or destroyed or altered, or partially or fully unassembled.
6. Do not use the play structure when the parts of the structure reach a temperature of 100 degrees F.
7. Ensure that the environment around the structure is safe and that no flame or heat producer or anything hazardous is near.
8. Do not use or store the product next to any fire.
9. Do not use any broken parts.
10. Do not throw the tubes or panels.

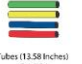

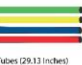

Maintenance

- Inspect your play structure before each use, make sure there are no loose contents, missing parts, screws, or broken pieces. Any missing or damaged pieces should be replaced immediately.
- Maintain the pieces by periodically washing the play structures with warm water and a little detergent. Do not use any harsh detergent or compounds on the surfaces.
- The color of the plastic pieces may fade by sunshine, you can however use them indoors and outdoors. Score indoors, and if left outside for a long time make sure to cover it and protect everything with a cloth.
- Not following these guidelines is not only dangerous to children, but will also immediately void any warranty.

Warning:

This package has small parts that can be swallowed! Not for children under 3 years. There is danger of choking and/or suffocation!

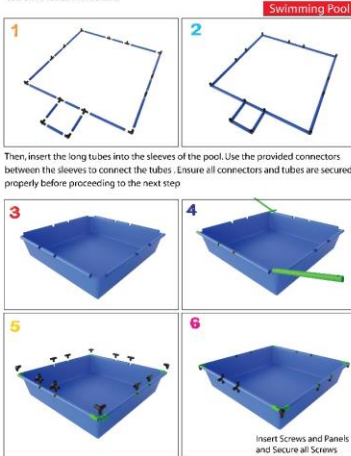

Parts list

Swimming Pool Warnings:

- Parents should inspect structure before use and from time to time to ensure screws are fastened tightly and correctly.
- Enter the pool at your own risk. By entering the pool, you take full responsibility for your own protection and the protection of your children.
- All children must have adult supervision.
- Keep your eyes on your children for the duration of their play to prevent drowning in any depth of water, including shallow areas.
- Funphix recommends that at least one adult supervisor should know CPR.
- If a child is not a proficient swimmer, they should wear a life safety jacket or floaties.
- No diving is permitted in the pool.
- Shoes should not be worn in structure.
- Slippery when wet.
- Do not use the pool if you have cuts, any skin diseases, a cold, fever, infection or other physical illness.
- Clean water does not have a scent. If you use chlorine in your pool and smell a strong scent, we recommend testing chlorine and pH levels to ensure the water's safety.
- According to the CDC, cryptosporidium is a common fecal parasite in pools. Please empty and clean your pool frequently to prevent contact with this parasite.
- Do not build pool over concrete, asphalt or any other hard surfaces.
- Take pool down when not in use for safety.
- Pool should only be used in daylight.
- It is recommended that children wear sunscreen while playing outside, in the pool, and stay hydrated while playing in the sun.
- Do not swallow pool water.
- Dry eyes thoroughly after swimming.
- Do not urinate in the pool.
- It is recommended that swimmers shower for at least one minute to remove dirt or anything unnatural on your body before entering swimming pool.
- If you or your child is sick, do not use swimming pool.

Assembling this pool is a simple, easy, three step process. Start by building the pool's base, as well as attaching the tubes that stand vertically, secure the tubes with screws.

Once connectors are secured, place the structure of the pool with the tubes and connectors on top of the base you built. Place connectors into the vertically standing tubes and fasten tightly with screws.

Now your structure is complete! When you are ready to drain it, there is a drain attached to the structure. Ensure that the drain is closed before you fill the pool with water, and only open the drain when you are ready to release the water.

Warranty:

It is our ultimate goal to serve our happy customers.

Warranty:

1 year warranty on Funphix parts when used indoors.

3 year warranty on Funphix parts when structures have been used or stored outdoors for greater than 1 year.

Dear kids,

The team at funphix is excited to see you creating your own play structures. Send us a picture or video of your play structure which you self-designed or built from the manual.

We will consider posting it on our gallery. Send the image to mystucture@funphix.com
